

This was a web page for their Multi-Vitamin. The multi was the 2nd best selling product when they were using this and other copy that I wrote.

NutriHarmony's Real Food™ Multi-Vitamin

Living Energy in a Capsule

Specially Grown in Aqua Farms

NutriHarmony's Multi-Vitamin and Mineral formula is manufactured in the most extraordinary way. Imagine a farm where water instead of soil is used to grow rich, vibrant crops. It's called Aqua Farming, and it's a revolutionary way of creating the most amazing food supplements.

At NutriHarmony we don't make our Multi-Vitamin and Mineral formula synthetically in a laboratory as practically every other company does. We literally grow our formula indoors in huge stainless steel tanks-one nutrient at a time!

Our Real Food™ Multi is grown in aqua-gardens, using pure pharmaceutical grade water and pure pharmaceutical grade air — literally a kind of microcellular organic garden, away from all the contamination and pollution, depleted soil, and all the stress and toxins in our environment.

Our aqua farmed plants are harvested when enzyme activity is at its peak, making this the most vital and life-giving multi-vitamin and mineral formula available. It's all part of the NutriHarmony Real Food Process™, designed to deliver a nutrient profile with the enzymatic quality, energetic value and nutrient density that the earth had when it was young.

Most vitamins available today are made of synthetic chemicals, petroleum by-products, or coal-tar derivatives (all inorganic matter), which the body does not recognize as food.

In an era when conventionally farmed food is depleted and increasingly devoid of nutrition, NutriHarmony is the real food grocer you can trust.

Here's Your Nutritional Insurance Policy

Using NutriHarmony's exceptional multi-vitamin and mineral formula is like taking out a nutritional insurance policy, to insure that you are not missing any critically essential nutrients — which you must have to survive and help prevent health problems.

By supplementing with the nutrients that are missing in your daily diet, you can provide the building blocks for vibrant health, sustained energy, increased resistance to health problems and a much higher quality of life.

Perhaps the greatest of all breakthroughs with the Real Food™ Multi is that Patrick Shelley designed a way to stabilize and preserve living energy in a capsule.

The net result of this process is that you end up with a multi-vitamin and mineral that's packed with life giving nutrients, an enzyme rich formula, which your body can recognize as Real Food™. This is one product you should never be without!

NutriHarmony's Real Food™ Multi-Vitamin Ingredients:

Made with *Saccharomyces cerevisiae* (living plant cells), which the Real Food Process™ utilizes to transform pure grade vitamins and minerals into Real Food™ usable forms. Active Aloe™ is added for synergism and multiplied effect. Each of the 90 capsules contains a full range of vitamins and minerals and 50 mg of Active Aloe™.
